

Internet Safety and Awareness Presentations

Presented by

Prevent Child Abuse
Louisiana

The Web 2.0 Generation is totally absorbed by new technology. Texting, Social Networking, Emailing, Tweeting...what's next? Technology has changed the way we conduct our day to day lives and the way youth communicate and play, and there is no time like the present for parents, adults, and members of communities across our state, to join in on the efforts to protect all of our children whether they live in our homes or not.

Prevent Child Abuse Louisiana would like to invite you to participate in an upcoming webinar presentation on Internet Safety and Awareness, created by NetSmartz. The presentations will be offered monthly, in 30 to 45 minute sessions. If you are interested in participating in a webinar listed below, on the available dates, please email your contact information and choice of webinar date to prevent@pcal.org. Prior to the webinar you will receive a confirmation email with details on how to participate in the webinar.

Thank you for your interest, and we look forward to your participation!
